

SREEKAR BOORLE

Python Developer | Backend & API Developer
bsreekar30@gmail.com | +91-8519975949 | github.com/Sreekar-30

PROFESSIONAL SUMMARY

Python Software Engineer with professional experience developing web applications, automation solutions, and scalable backend systems using Python, FastAPI, JavaScript, and MySQL. Skilled in designing REST APIs, implementing OOP-based architectures, optimizing application performance, and writing clean, maintainable code. Experienced in debugging, API integration, Git-based workflows, and Agile development, with a proven ability to deliver reliable software solutions in collaborative environments.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C
Backend: FastAPI, Flask, Spring Boot, REST APIs, JWT Authentication, API Integration
Concepts: OOP, Clean Code, Agile, Software Documentation, Code Reviews, Testing
DB & Tools: MySQL, Git/GitHub, Docker, Postman, CI/CD, Render, Vercel

PROFESSIONAL EXPERIENCE

Software Developer - Technodyne Informatics Pvt. Ltd.

2025 – Present

- Developed and maintained web applications using Python, JavaScript, HTML, and CSS, ensuring responsive and user-friendly interfaces.
- Built a Python-based automation pipeline to streamline client asset processing, cutting repetitive manual work; developed reusable JS components using OOP principles for responsive, mobile-first UIs.
- Collaborated with cross-functional teams to gather business requirements, contributed to problem-solving discussions, and documented component architecture to support team knowledge transfer.
- Improved debugging and troubleshooting workflows, systematically resolving performance bottlenecks to enhance deployment efficiency across client projects.

PROJECTS

Geo-Fenced Attendance & Access Control System (Python, FastAPI, MySQL, REST APIs)

- Designed Python/FastAPI backend with OOP-structured authentication modules; GPS-based radius validation reduced unauthorized attendance access by 40%.
- Optimized MySQL schema and queries for 30% faster data retrieval; documented API architecture and maintained full version control via Git throughout the project lifecycle.

Scalable Expense Tracking API Platform (Python, FastAPI, MySQL, REST APIs)

- Engineered scalable Python/FastAPI backend with CRUD, filtering, sorting, and pagination following clean code and OOP best practices; reduced server-side processing overhead by 25%.
- Implemented validation, exception handling, and testing activities ensuring software quality and reliability; applied self-review process against coding standards before each release.

NLP-Powered Intelligent Chatbot (Python, Flask, NLP, REST APIs)

- Built modular NLP chatbot in Python/Flask using OOP design patterns; REST APIs integrated frontend and backend with documented software contracts for maintainability and future development.

INTERNSHIP EXPERIENCE

Data Science Intern - EI Systems

2024

- Automated end-to-end data workflows in Python via scripting and task automation, reducing manual intervention and improving pipeline efficiency through systematic debugging.

Backend Development Intern - Virtual Program via Forage

2024

- Designed and deployed REST APIs with optimized database interactions for scalable performance; used Git for version control and contributed to code quality through self-review and testing activities.

EDUCATION & CERTIFICATIONS

B.Tech — Computer Science & Systems Engineering
Andhra University | CGPA: 7.4 | 2021-2025

Python - Coursera | FastAPI - Udemy
Java - NPTEL | SQL - HackerRank
